

# UPDATE WARNING

Hello,

If you already have AIT installed on your computer,  
It is not necessary to copy all the files if you are just doing the update.  
Just replace the file "(AIT) Artificial Intelligence Titles.JSXBIN"

This warning is for this version only.  
Maybe in future updates with new Free Starting Presets,  
you'll need to swap out all the files as explained in the User Guide, okay?

Kind regards.

AIT Team
