

# PPW v 4.1.0 Installer: CC2014–CC2015–CC2015.5

## NOTES:

This installer automatically removes any version of the panel from the version of Photoshop into which you are installing.

If you are currently using the panel successfully in a Photoshop version prior to CC2014, the installer will not affect that previous version.

Whether you run the installer on CC2014 or on CC2015 and CC2015.5 the panel will nevertheless appear in the other version, but it will not be fully functional. To get the full functionality in both, you must run the installer first to one program, then the other.

This installer works per user account. If you wish to use the panel on more than one account you must install it twice, just run it onto the version of Photoshop in which you wish the panel to appear.

# MAC Installation: CC2014-CC2015-CC2015.5

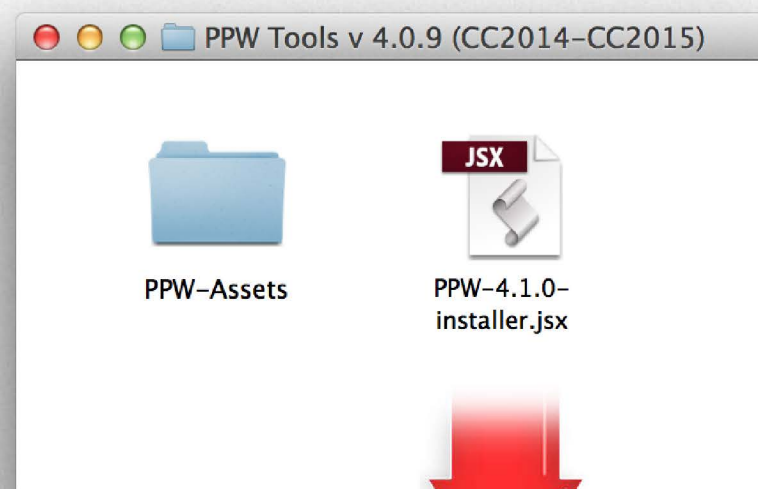

Install using the file "PPW-4.1.0-installer.jsx"

Stored in the folder "PPW Tools v 4.1.0 MAC (CC2014-CC2015-CC2015.5)"

Don't move, change or rename the content of this folder.

## 1. Unzip the Install Folder

## 2. Drag the PPW-4.1.0-installer.jsx file onto the Photoshop icon

## MAC USERS

The PPW Installation process is very easy.

Simply drag the "Installer.jsx" file onto the Photoshop icon

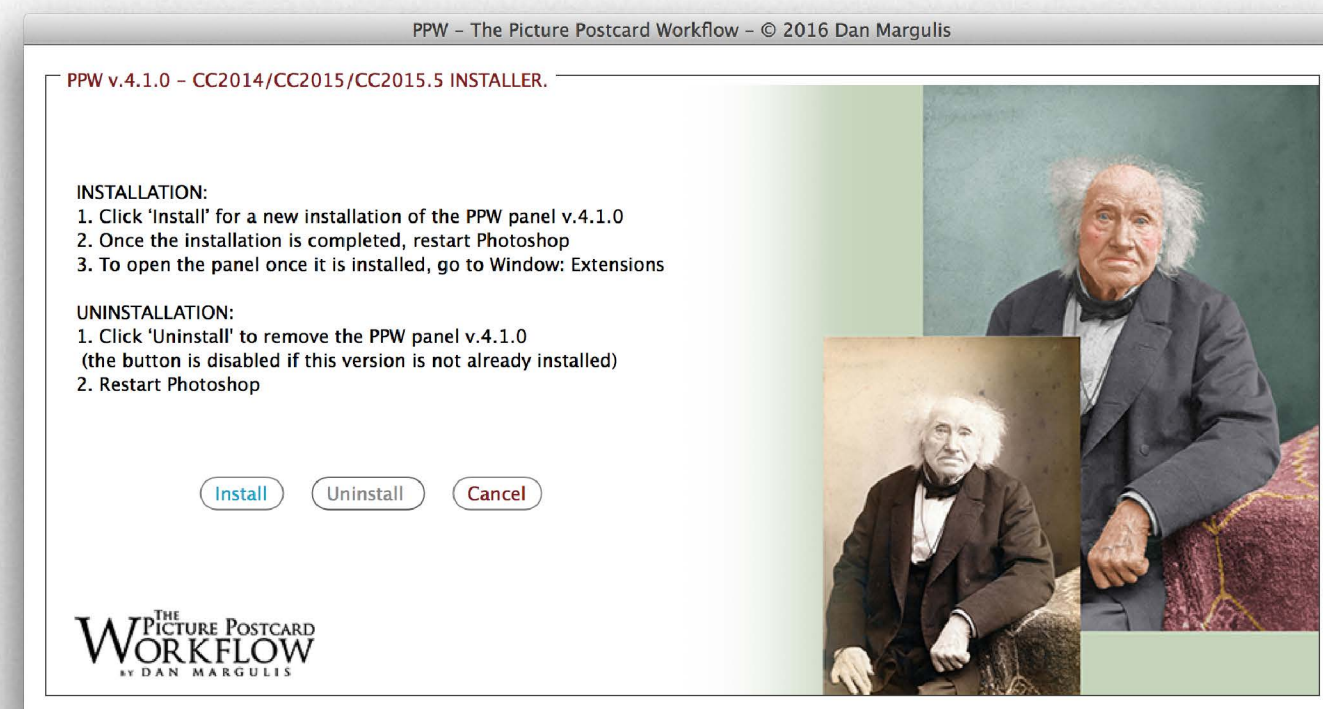

Then click the "Install" button. Once completed restart Photoshop.

Follow the instructions below or watch the tutorial video.

## 3. Click the 'Install' button

This window will open: click "Install" for a new installation.

The "Uninstall" button will be active once installed.

## 4. Restart Photoshop

## 5. Open the PPW panel from the Extensions menu

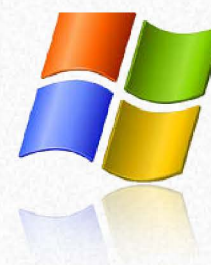

# WIN Installation: CC2014–CC2015–CC2015.5

Install using the file "PPW-4.1.0-installer.jsx"

Stored in the folder "PPW Tools v 4.1.0 WIN (CC2014–CC2015)"

Don't move, change or rename the content of this folder.

## WIN USERS

WIN users must run Photoshop as an administrator

Right-click on Photoshop program and choose:

Run as administrator.

Enter your administrator password when requested

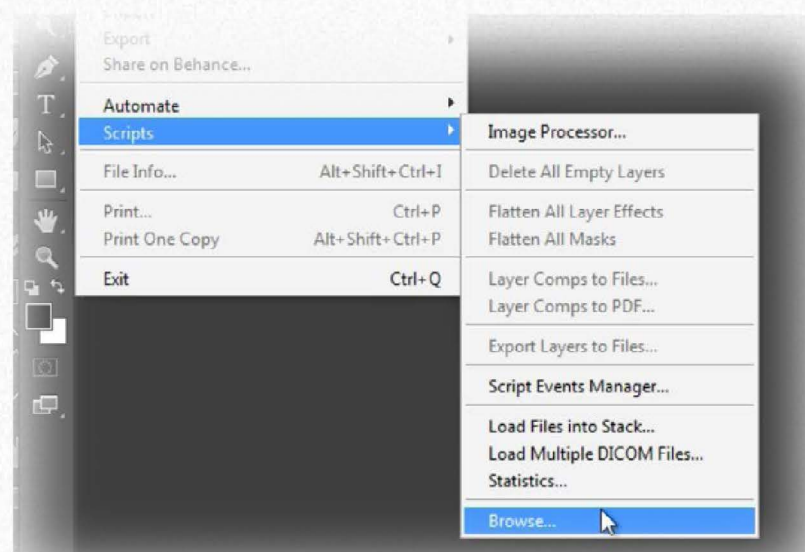

Follow the instructions below or watch the tutorial video.

## 1. Unzip the Install Folder on your desktop

## 2. Run Photoshop as an Administrator (see "WIN USER" box above)

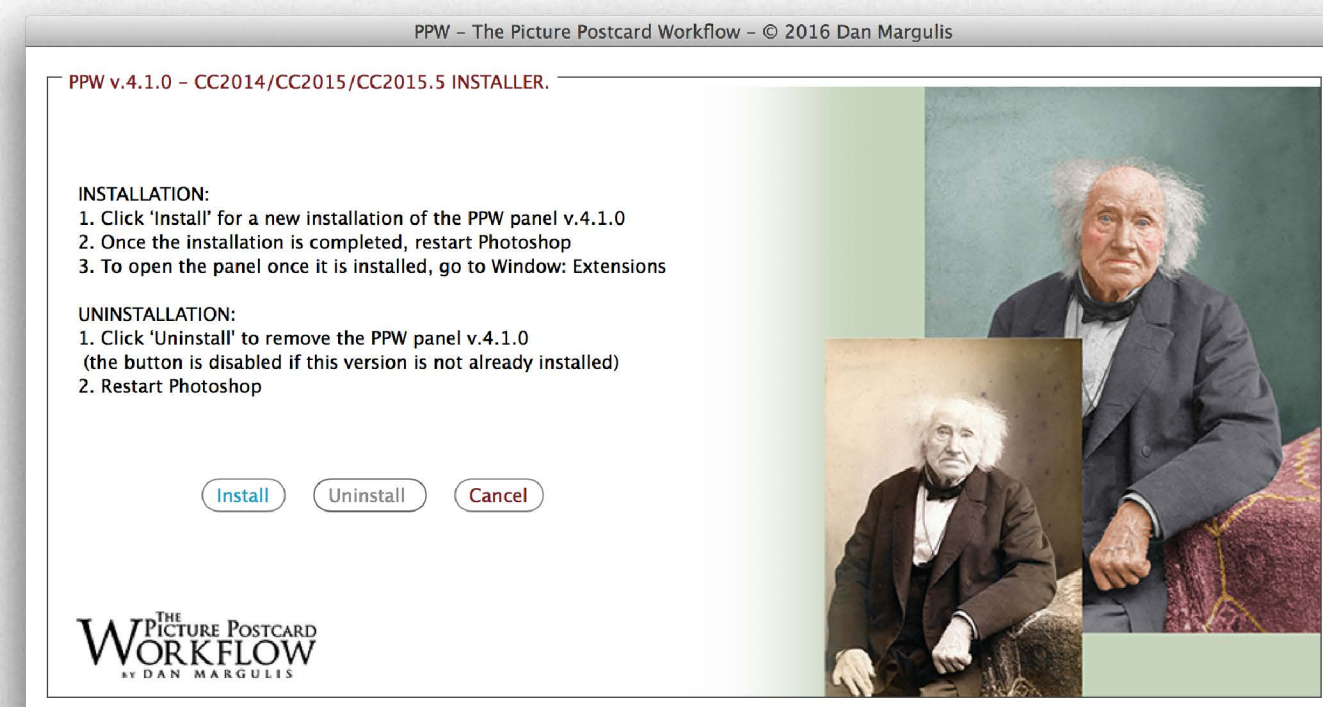

## 3. Navigate to File>Scripts>Browse and open the PPW-4..1.0-installer.jsx from the unzipped folder

## 3. Click the 'Install' button

This window will open: click "Install" for a new installation.

The "Uninstall" button will be active once installed.

## 4. Restart Photoshop

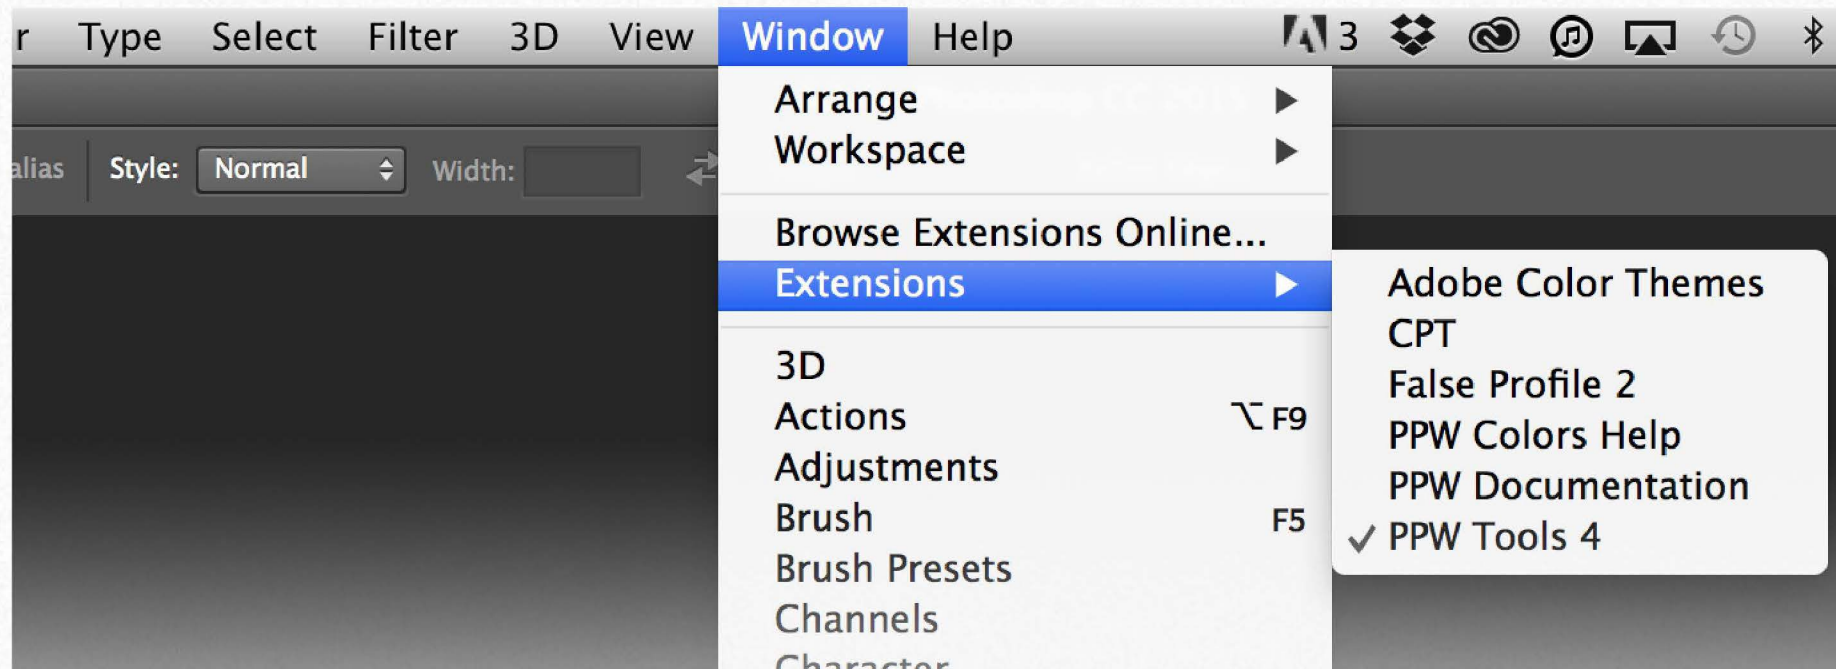

## 5. Open the PPW panel from the Extensions menu

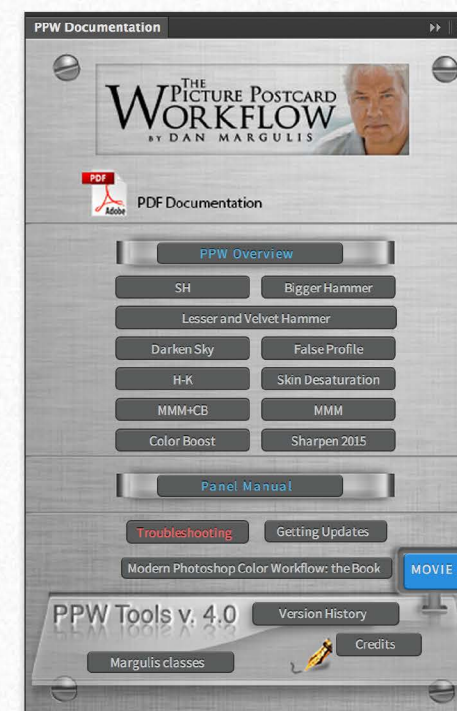

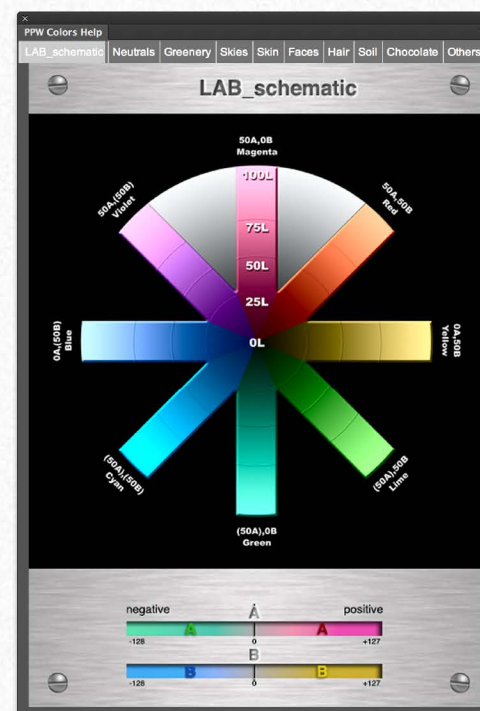

# Where to find PPW panel within Photoshop

You can access the panel by choosing Window/Extensions/PPW Tools 4.

You can access all Documentation from within the PPW panel by opening the PPW Documentation panel and the PPW Color Help panel.

# What is installed

## Where to find the user Library folder (hidden folder)

The user Library by default is hidden. To reveal it go to: "Finder/Go" menu and press the Option key.

By default the folder "AppData" is hidden. To reveal it type: %appdata%\Adobe\CEP\extensions in your system search field and hit enter.

### Scripts

Cromaline  
Software

Content of the Cromaline\_Software folder

- PPW\_BiggerHammer
- PPW\_MMM
- PPW\_MMM\_CB
- PPW\_Sharpen2015
- PPW4\_Lib
