3D THAT! – Get into three dimensions – Read Me

First of all, thanks for buying one of my graphic files! I appreciate this and I would love to help you with your purchase. Underneath this intro text I will explain how to alter some of the parts of your purchase. I hope it will help you, and of course, good luck!

---

1. **Open any file** in Adobe Photoshop CS or higher.
2. **Make sure the layer/vector shape** you will turn into 3D has the name **3D**
3. **Give it the color you want it to use to create the 3D image.**
4. For best results, use a 2000x2000 **image or a vector shape layer with a color** and place it in the center of the canvas. Also, try to resize it to near the edges.
5. **If you need to turn a text layer into 3D, turn it into a vector shape first. (Right Click layer -> Convert to Shape)**
6. Now double click the **3D Action.atn** file in the Action folder.
7. Inside Photoshop, **click play on the 3D Action**, and watch Photoshop doing the dirty job for you!
8. **Enjoy!**

To see what your basic setup should look like, see the Sample.psd file in the PSD folder. Try it out with the action!

Don't forget to give me a rating for the file & follow me! ☺ Thanksss!!
