	<i>Other Unix – AIX, Solaris Intel, Solaris Sparc, HP-UX</i>	<i>Unix Download</i>	<i>Unix Instructions</i>

[Download Previous Versions](#)

Windows Instructions:

- *Instructions*
 - *After downloading, double-click PDFStudio_v10_x_x_win.exe (where x_x should be replaced with the current version number).*
 - *[\(Go To Top\)](#)*
-

Mac OS X Instructions:

- *Instructions*
 - *After downloading, the installer should launch automatically and create an icon on the desktop.*
 - *The installer is a standard PackageMaker installer packaged inside a disk image. The operating system should recognize the files and launch the installer automatically.*
 - *If the installer doesn't start on its own:*
 - *Double click on the installation file PDFStudio_v10_x_x_mac.dmg (where x_x should be replaced with the current version number) to mount the disk image, then double click on the mounted image.*
 - *Finally double click on the installer PDF Studio Installer.*
- *Notes*
 - *PDF Studio 10 works on Mac OS X 10.10 (Yosemite), Mac OS X 10.9 (Mavericks), 10.8 (Mountain Lion), 10.7 (Lion), 10.6 (Snow Leopard).*
 - *After installation, the installer should remove the downloaded files automatically. If this does not*

happen, you can manually drag the files to the trash.

- [\(Go To Top\)](#)
-

Linux AMD 64 Instructions:

- *Instructions*

After downloading the installer, open a Terminal window and type the following two commands:

- *cd Downloads to go to the directory where you downloaded the installer.*
- *sh ./PDFStudio_v10_x_x_linux64.sh (where x_x should be replaced with the current version number). This will start the installer.*

To install PDF Studio on multiple computers through command-line, you may use our [64 bit Debian package](#) (right-click and save link as) . This package will install PDF Studio in the "/opt" directory.

- [\(Go To Top\)](#)
-

Linux 32Bit Instructions:

- *Instructions*

After downloading the installer, open a Terminal window and type the following two commands:

- *cd Downloads to go to the directory where you downloaded the installer.*
- *sh ./PDFStudio_v10_x_x_linux.sh where x_x should be replaced with the current version number. This will start the installer.*

To install PDF Studio on multiple computers through command-line, you may use our [32 bit Debian package](#) (right-click and save link as) . This package will install PDF Studio in the "/opt" directory.

- [\(Go To Top\)](#)
-

Other Unix Instructions: AIX, Solaris, HP-UX

- *Instructions*

- *After downloading the installer, open a shell and, cd to the directory where you downloaded the installer.*

- *At the prompt type: `sh ./PDFStudio_v10_x_x_unix.sh` (where `x_x` should be replaced with the current version number). This will start the installer.*
- **Notes**
 - *You need to install a Java 1.7 virtual machine. When available, we strongly recommend using the JVM distributed by Sun Oracle as our experience has been that other JVMs introduce a lot of issues in PDF Studio (GTK issue with toolbar spacing issues, no SWT support for native file browser, other bugs with image rendering). You can download one from [Sun's Java web site](#) or contact your OS manufacturer.*
