The PDF-Analyzer is Freeware

So this analysis version you can use as long as you want without paying anything...

If you need more a version for modifying and with additional functionalities you should go on reading here about the **PDF-Analyzer Pro ...**

this actual selected changing-function,
THE RESET OF (UNKNOWN) MAIN PASSWORDS WITH A MOUSECLICK,
the embedding of additional files into the pdf as attachments,
the removing of additional embedded file attachments from pdf-documents,
the merging of pdf-files,
inserting/appending images and txt-files,
a comfortable searchfunction regarding meta data and pdf properties for the whole directory,
fulltextsearch,
a comfortable watermark-/logo-function,
extraction for text, javascript- and rdf-(xml)content,
removing single layers from pdf-documents,
making your own notes directly inside the pdf-document,
automatic pdf-generation for images (jpg, gif, bmp, tiff, png, wmf, emf) and text-files,
separating, copying and deleting from single or more pages of a pdf-file,
splitting a pdf-file in an index- and a content-part for really fast web access,
an exportfunction for whole (sub-)directories with pdf-file-data in xml- and csv-format,
the creation of longer textnotes which will be shown while opening a pdf-file,
modifying the document-, security- and layout-attributes,
passwordsetting (user and master) and for example
preventing the print- or copy-functionality for pdf-files,
the extraction of embedded images from a pdf-document,
the automatic creation of images (jpg) from each page of pdf-documents,
the extraction of all embedded images from a pdf-document,
the automatic creation of image-files (jpg) from each page of a pdf-document …

… are features from the PDF-Analyzer Pro!
