Installation Instructions

Installing Magic Retouch Pro Retouch Preset

Magic Retouch Pro retouch preset is required for the Skin Retouching feature to work properly. To install the retouch preset, open photoshop then goto File>Open. Now navigate to the folder where Magic Retouch Pro is downloaded. Open that folder and navigate to 'Retouch Preset.tpl' and click on Open button. Now the preset is installed and skin retouching will work properly.

Installing Magic Retouch Pro Plug-In Panel

Automatic Installation

Step 1: Download and install ZXP Installer from this site: www.zxpinstaller.com

Step 2: Open ZXP Installer and select the downloaded Magic Retouch Pro zxp file from Automatic Installation folder.ZXP installer will install the extension and will display a message after installation.

Step 3: Launch Photoshop and goto Windows>Extensions>MagicRetouchPro.

Manual Installation

In case you are having difficulties using the automatic installation method, you can install it by using the manual method below.

NOTE: If you are upgrading from previous version delete the previous version first do not overwrite on it.

Step 1: Open the Manual Installation folder from the Magic Retouch Pro package which you downloaded.
Step 2: Copy MagicRetouchPro folder from Manual Installation folder and paste it to the following directory

Windows 64-bit:

C:\Program Files (x86)\Common Files\Adobe\CEP\extensions\

Windows 32-bit:

C:\Program Files\Common Files\Adobe\CEP\extensions\

If the Adobe\CEP\extensions folder does not exist, you can create it.

Relaunch Photoshop and goto Windows>Extension>MagicRetouchPro

MAC OSX:

Step 1: Open folder /Library/Application\ Support/Adobe/CEP/extensions/ or you can open this folder via terminal by entering ”/Library/Application\Support/Adobe/CEP/extensions/" command without quotes.

Step 2: Navigate to downloaded Magic Retouch Pro folder then goto Plug-In>Manual Installation and copy folder MagicRetouchPro and paste it in /Library/Application\ Support/Adobe/CEP/extensions/ folder.

Step 3: Relaunch Photoshop and goto Window>Extension>MagicReotuchPro

Uninstalling Magic Retouch Pro

Windows 64-bit:

Step 1: Navigate to "C:\Program Files (x86)\Common Files\Adobe\CEP\extensions\"
Step 2: Delete Magic Retouch Pro folder.

Windows 32-bit:

Step 1: Navigate to "C:\Program Files\Common   Files\Adobe\CEP\extensions\"
Step 2: Delete Magic Retouch Pro folder.

MAC OSX:

Step 1: Open folder /Library/Application\ Support/Adobe/CEP/extensions/ or you can open this folder via terminal by entering ”/Library/Application\Support/Adobe/CEP/extensions/" command without quotes.
Step 2: Delete Magic Retouch Pro folder.

Troubleshooting Tips

- If skin retouching is not working make sure that "Sample All Layers" is checked otherwise it will not work.

- This product will only work with Photoshop CC (2014-2015) English version only. Photoshop CS6 and below is not supported and will not work.

- Make sure default Photoshop brushes are loaded.

- Make sure Magic Retouch Pro Support Actions are installed otherwise Effects will not work.

- Make sure Retouch Preset is loaded in Photoshop, otherwise skin retouching will not work as intended.

- Adobe dropped support of Extension Manager for Photoshop CC 2014 and above so it is not possible to install extension via Extension manager, instead use ZXP Installer.
