

Instrument Flying Groundschool

Lesson 1: Introduction and Overview

Chris Hobbs
Jean Rene de Cotret

Course Structure

- Introduction to the course and IFR flying
- Flight planning
- Departures
- En Route
- Arrivals
- Approaches 1, 2 and 3

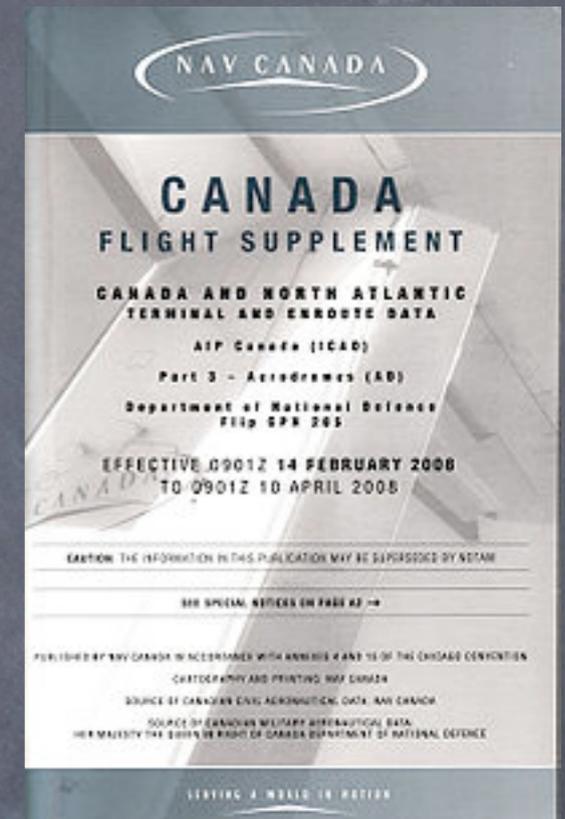

Each a 90 minute lesson

Requirements

You will need:

- A LO5/6 Chart
- A Canada Air Pilot (CAP) 4: Ontario
- A Canada Air Pilot (CAP) General Pages
- A Canada Flight Supplement
- A copy of the Instrument Workbook

All of these need to be up-to-date.

Prerequisite Knowledge

- An understanding of the LO chart as would be gained at a CPL groundschool
- An ability to read weather reports and forecasts

Lesson 1: IFR Overview

Target for this evening:
provide you with the tools to
prepare an IFR flight from
Waterloo, Ontario to Ottawa,
Ontario.

For homework you will
complete the flight preparation
and we will "fly" it next lesson.

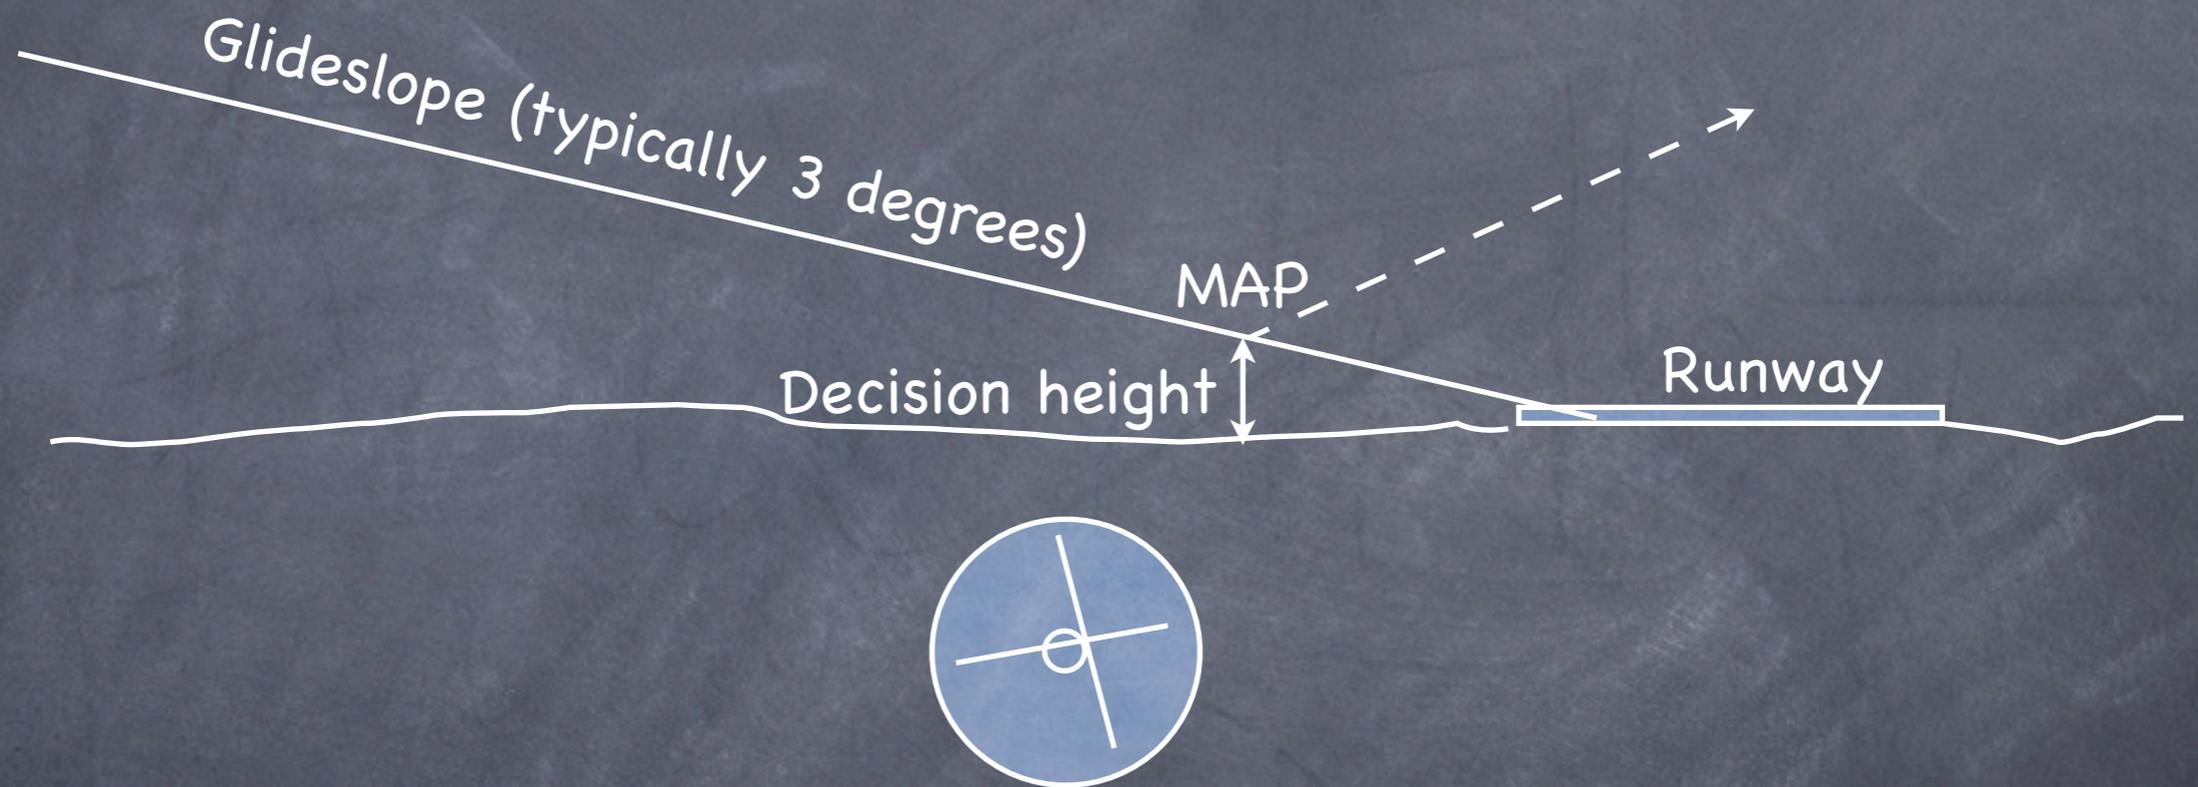

Terminology

Precision Approach: one with both vertical and horizontal guidance

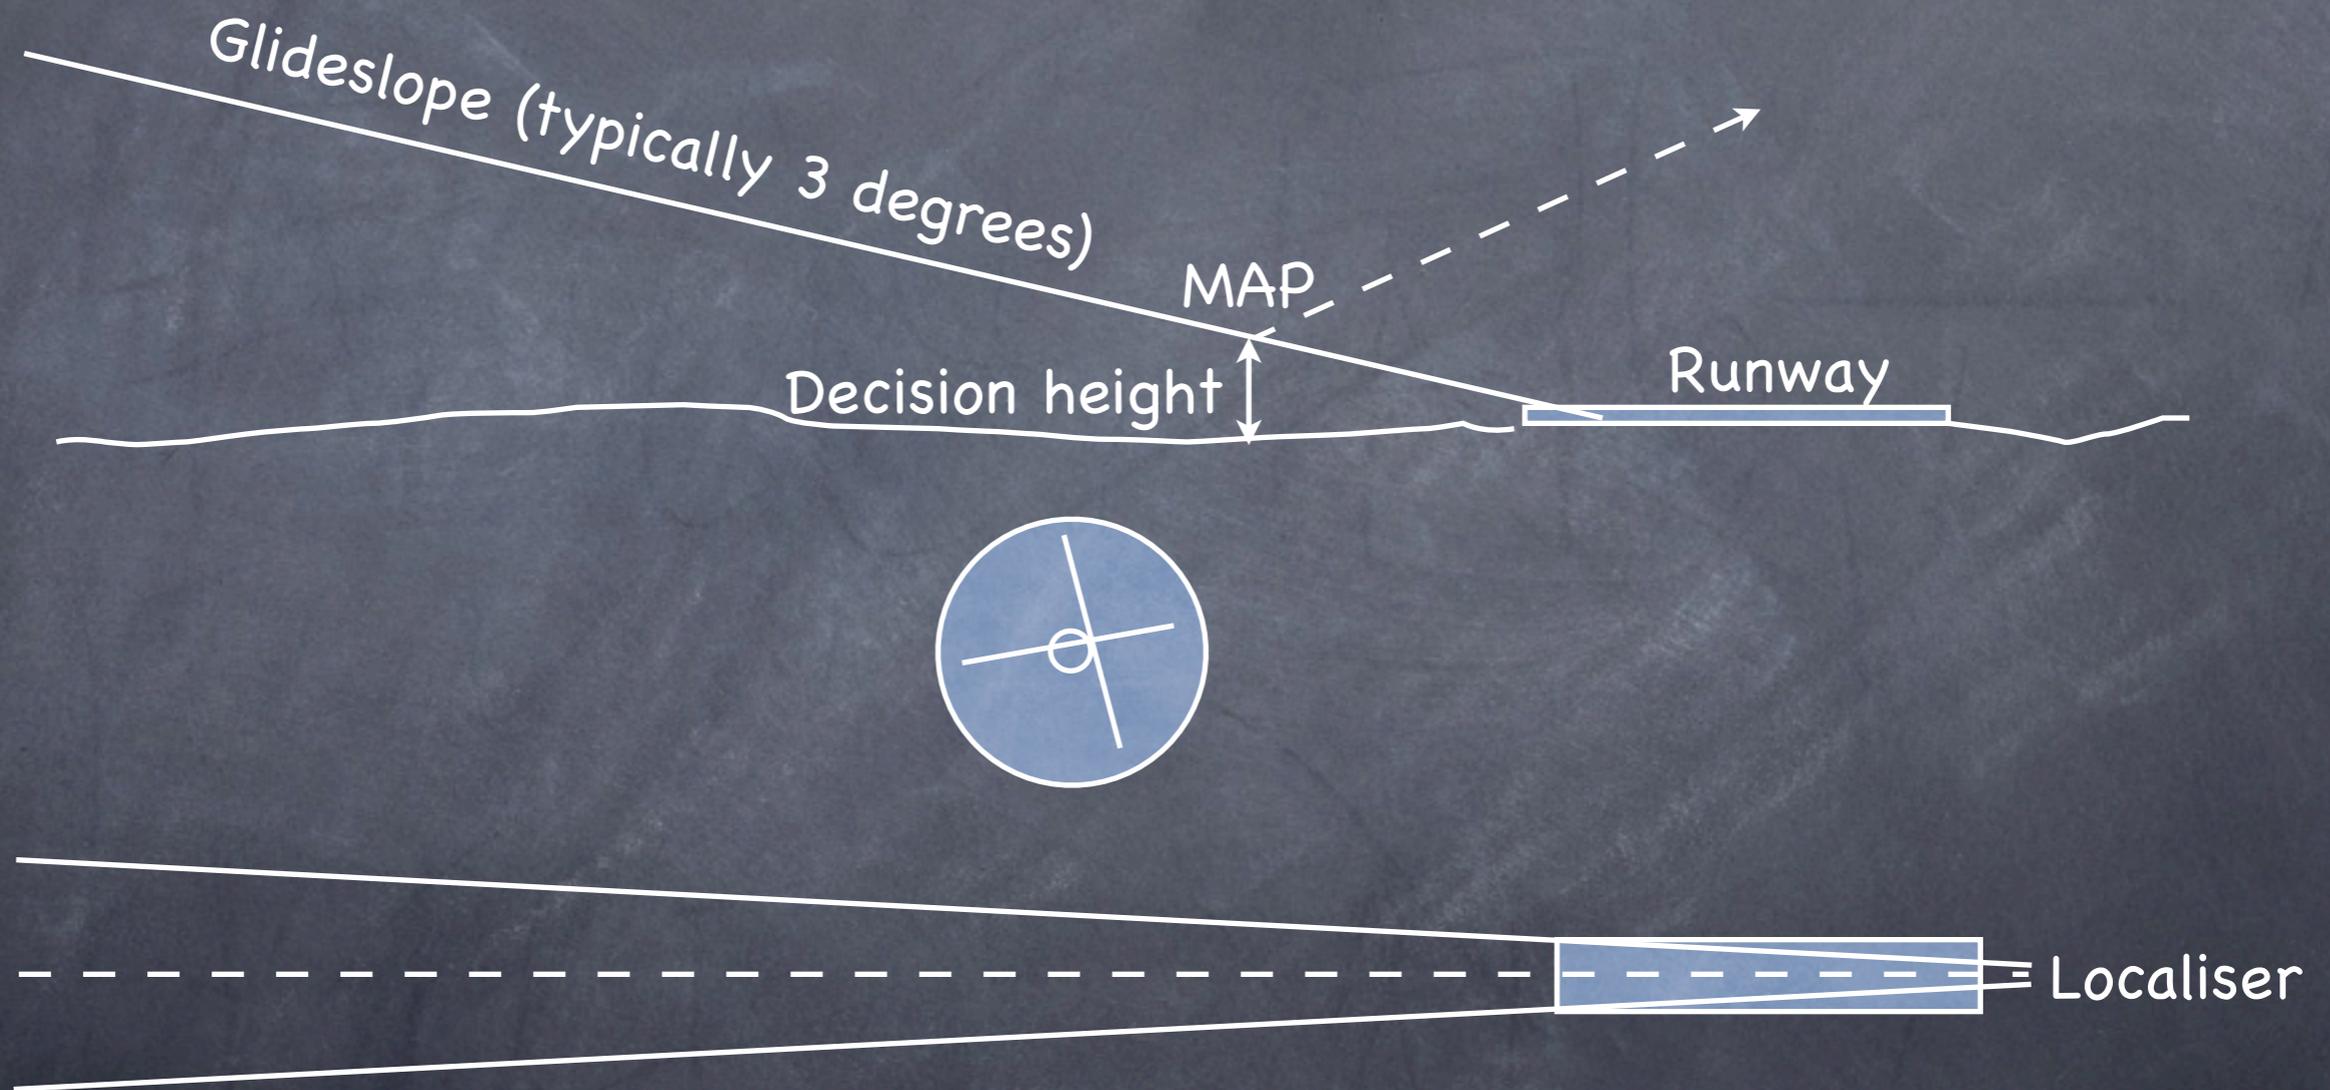

Non-Precision Approach: one providing only horizontal guidance

Localiser Precision with Vertical Guidance (LPV): WAAS GPS Approach

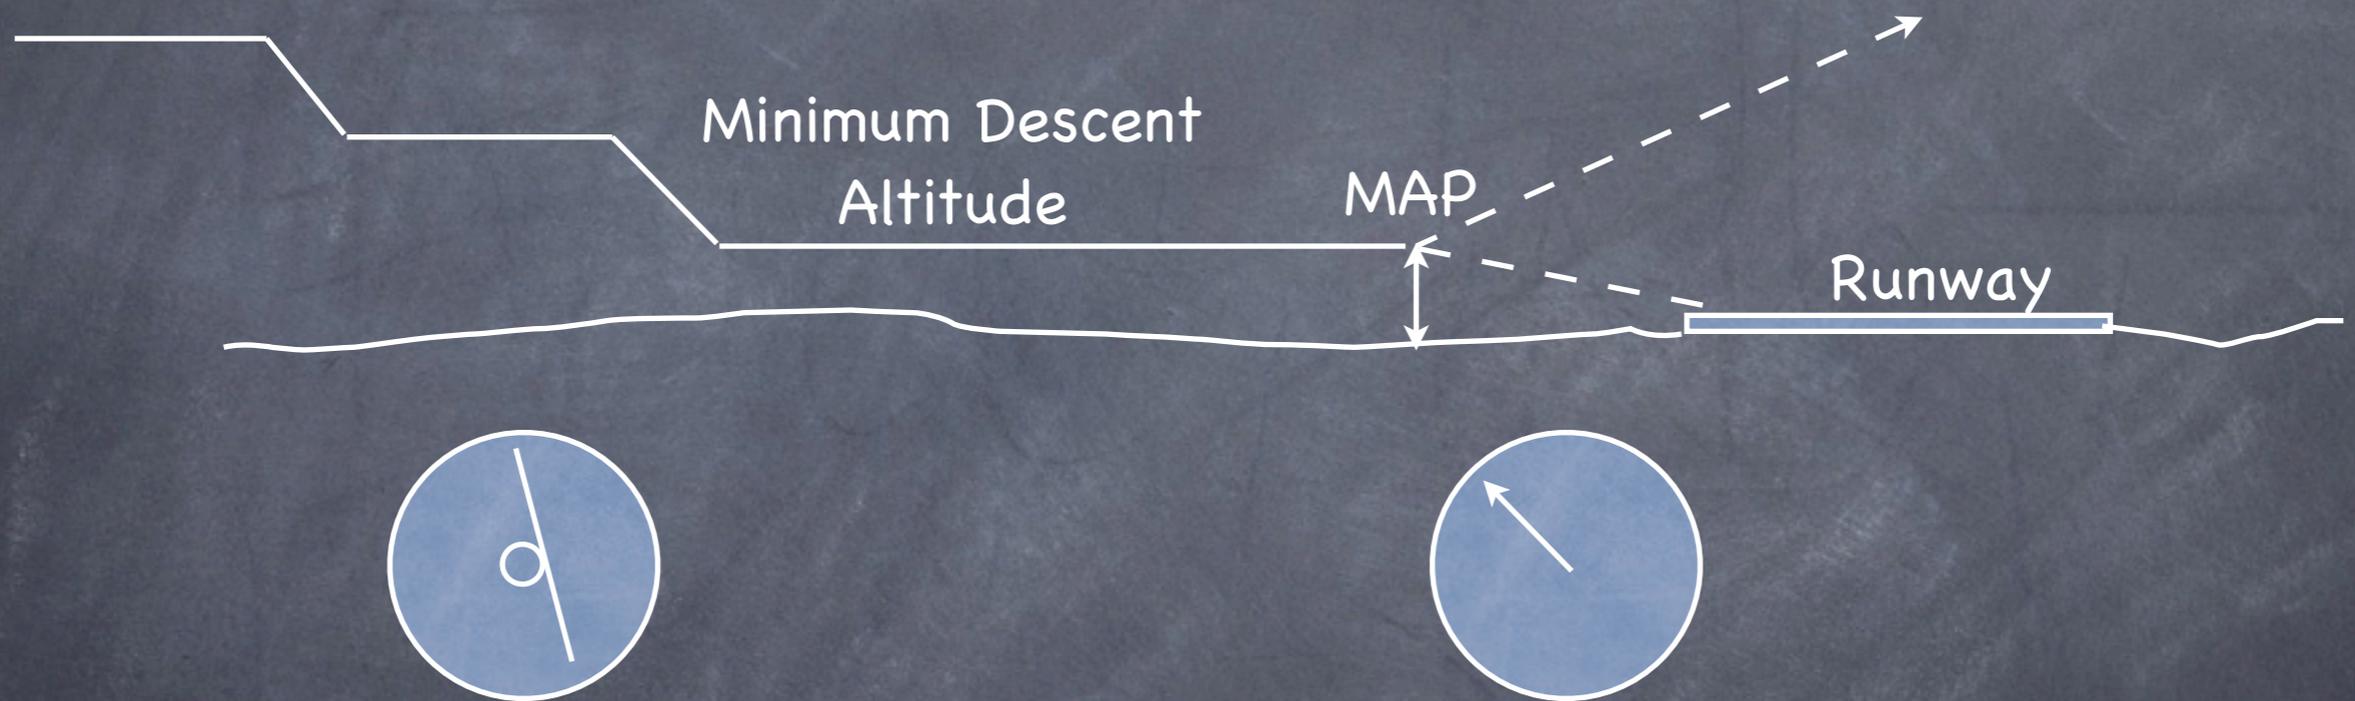

The Precision Approach

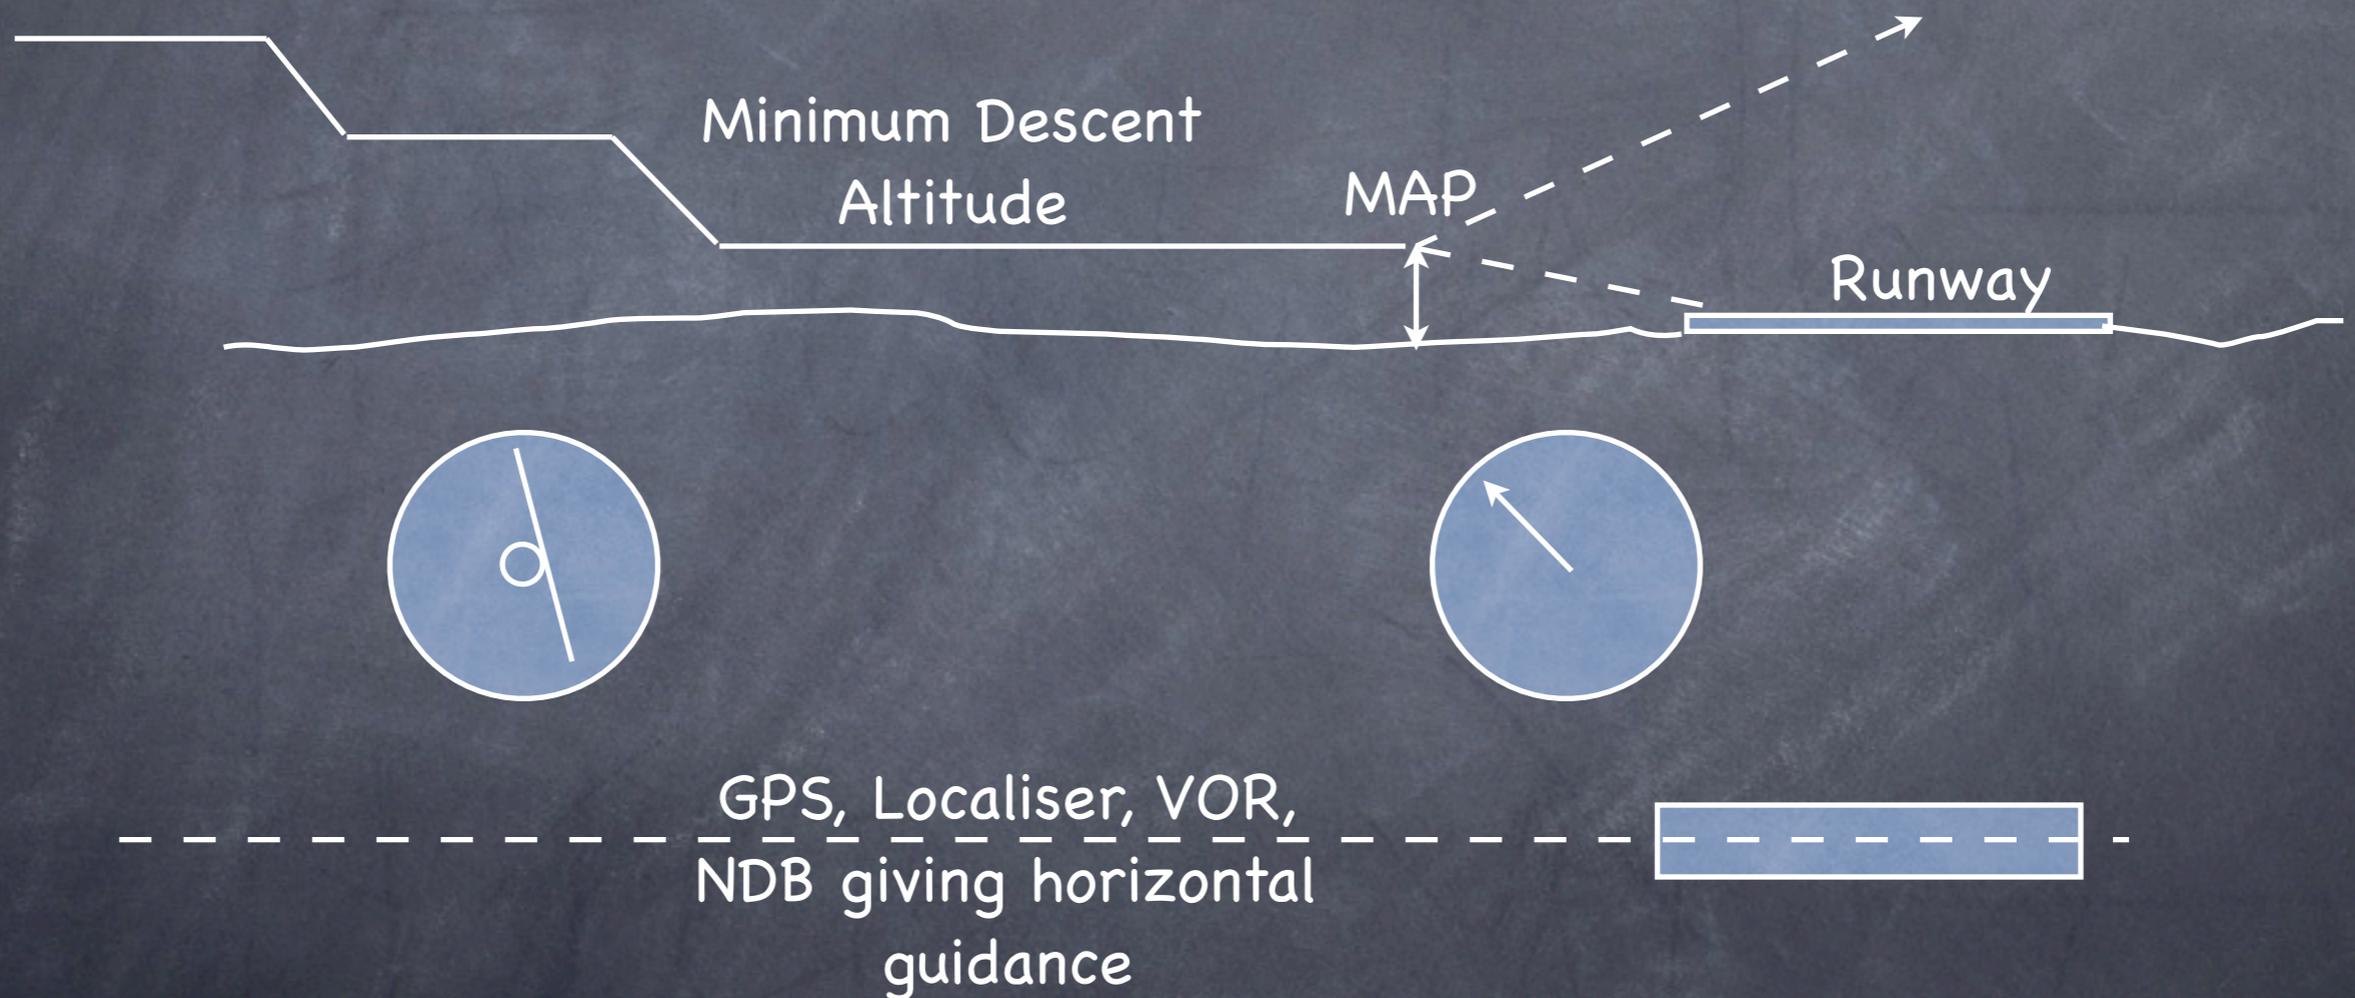

The Precision Approach

The Non-Precision Approach

The Non-Precision Approach

Preparation for Flight

- ① LO charts
